WANT BETTER DUCK HUNTING NEXT FALL?

There Is Still Time To Plant Natural Foods And Obtain Results This Year.

Good Hunting is no longer a gift of the gods; the plain and simple fact is, that you find game where there is sound and constructive propagation work being done. Finding food is the fundamental concern of all Wild Life and the SECRET of attracting large numbers of WILD DUCKS and holding them over the season. Propagate their Natural Foods by planting NOW.

IMPROVED FISHING THIS YEAR.

These same aquatic plants are also important as food and cover plants for Game Fish and will improve the angling this year. They support food, prevent cannibalism; clarify, purify and oxygenate the waters, all important to the fish life. All of the following plants important for Wild Ducks and Fish when once established in those waters are permanent, reproducing from year to year. They are rapid growers and easily planted (mostly broadcast).
